SUBJECT: PRELIMINARY Report #1 -- 2005 Pacific Whiting Fishery

This report consolidates preliminary state, federal, and tribal data for the 2005 Pacific whiting fishery (whiting) off Washington, Oregon, and California. Due to concerns about the incidental catch of overfished species, bycatch limits are in place for canary (4.7 mt) and widow rockfish (200 mt) taken in the non-tribal sectors of the fishery. If either bycatch limit is reached, the primary whiting seasons for the non-tribal fisheries will end regardless of the amount of whiting allocation remaining.

\* Catch includes discards from at-sea processors; weigh-backs from shore-based catcher vessels; and small amounts landed under the trip limit prior to the season. The data for at-sea processing sectors are based on preliminary NMFS observer data. Data for shore-based processors are provided by the States. Data for the at-sea processing portion of the Makah fishery are based on preliminary NMFS observers data and shore-based catch was provided by tribal samplers. All weights are in metric ton (2,204.6 pounds).
